

Loveland Living Planet Aquarium Presents **STABILITY AND CHANGE IN MARINE ECOSYSTEMS**

*FREE 6th Grade SEEd
Science Workshop*

This free, 4-hour workshop is correlated to the new 6th grade SEEd standards. Teachers will experience three dimensional science instruction and see how they can apply this exciting instructional model to their science lessons. In this workshop, participants will learn how to teach using phenomenon, engage students with science practices, and identify and emphasize cross-cutting science concepts.

All participants will receive lesson plans and teaching materials correlated to standard 6.4: Stability and Change in Ecosystems, from the new SEEd standards. These lesson plans are geared towards 6th grade teachers, but can easily be used as a starting point for 7-8th grade teachers looking to adapt existing lesson plans into the 3D model. Additionally, participants will receive 4 relicensure points and a materials kit.
