NASA: Journey to Outer Space

From our earth's atmosphere to the outer reaches of our solar system, this hands-on space program sends children on a quest for explorations! The exploration includes finding out how an astronaut lives, learning about suns, stars, and planets, and building and launching a model rocket.

Crazy Chemworks

Hop on board the chemistry express where students perform amazing experiments with split-second reactions! Students take home Crazy Chemworks Labware plus much more!

Eureka! The Inventor's Camp

Invention is 90% inspiration and 10% perspiration but 100% fun in our week long, hands on camp! Each day we look at different inventors, and work hands on with how they got to do what they invented--current electricity, airplanes, etc. Leonardo DaVinci and sci fi writers--WE PACK IT IN!

Dig Into Archaeology

Discover ancient civilizations and the tools and artifacts they used in everyday life! Study bone fragments, pottery shards, amber deposits, and fossils to understand what they can tell us about history! Each class includes a make and take project--a fossil reproduction, an amber time capsule, and coins from around the world!

Secret Agent Lab

Focus on the science of spies and detectives in this hands-on look at crime scenes and spy gadgets. Identify and collect evidence, analyze fingerprints and trawl through the suspects' trash.

Anatomy Academy

Learn the fascinating inner workings of the human body. This heart pumping chest pounding, dynamic discovery camp is sure to blow their mind! Use ooey-goey ingredients to build a model cell. Follow the "Organ Trail" to find out what keeps us alive. Join us for a gross look at the human body!

Eureka! The Inventors Camp

Campers will overcome a series of challenges using basic materials, simple machines, and tips from famous inventors. Most important of all this camp is 100% FUN!

Brixology Elemental

Have you ever seen something we use in everyday life and thought, "That could be so much better if...?" Well, join us in this LEGO® engineering camp and do what you've always dreamed about doing—fixing the world! Be an engineer—build and solve problems. We will explore aerospace, nautical, civil, and mechanical engineering.

Brixology Ultimate

The projects in this section of LEGO® engineering are more challenging. We build on some of the same concepts covered in Brixology 1, but the in-class projects take a bit more focus. We will emphasize biomimicry, mechanical, structural, and automotive engineering, as well as going in depth in these areas. It is not necessary to take Brixology Elemental to sign up for Brixology Ultimate. Each camp is super fun and challenging, and you can take one or both!

Jr. Engineers

Love to build and take things apart? You are an engineer! Let us help you find what kind of engineering is in your future. Cool Chemical, Solid Civil, Spacey Aeronautical or Electrifying computer.

Rockin' Rockets and Radical Robots

Explore the laws of physics and aerodynamics. Learn about circuits and programming while you build your own launch able Rocket and Radical Robot. Price includes \$10 Materials fee

Don't Delay

Register today at
greatersaltlake.madscience.org

Get a \$10 discount per camp if you register by May 31, 2019 (already built in, no codes necessary)

For more information call 801-292-8646

The cost is dependent upon the camp selected:

Rockets & Robots, Brixology, Dig Into Archaeology: \$180 for 5 days / \$150 for 4 days

Eureka, Crazy Chemworks, Secret Agent Lab, NASA!: \$170 for 5 days / \$145 for 4 days

Anatomy Academy, Junior Engineers: \$150 for 5 days / \$120 for 4 days

Discount: If you are signing up for more than one camp and/or signing up 2 or more children for the same camp, please use code **MADCAMP** to save an additional \$10 on each camp.

Refund Policy: If we do not get sufficient enrollment for a particular session, a full refund will be given. A full refund will be given up to the first day of class.
